

## **UL-LRF-12 Eyesafe Laser Rangefinder**

#### DESCRIPTION

The UL-LRF-12 laser rangefinder boasts an eyesafe design, compact size, lightweight construction, low power consumption, long lifespan, and wide temperature range, among other features. It is widely employed in various applications, including reconnaissance, surveying, and mapping.

Despite lacking an external shell, this laser rangefinder module includes a broad selection of interfaces, making it effortless to mount into any system. Additionally, for user convenience, PC software and communication protocols are available to aid in using the device with handheld devices and multifunction systems.

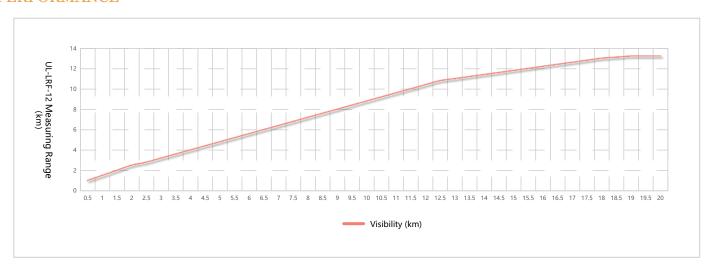

#### **FEATURES**

- Single shot ranging and continuous ranging
- 3-target detection, front and back target indication
- Contain self-checking function
- Wake-on-lan function
- Number of emitted pulses during MNBF ≥ 1×10<sup>6</sup> times

#### **APPLICATIONS**

- Handheld devices
- Unmanned aerial vehicle
- Electro-optical pod
- Border surveillance

#### **PERFORMANCE**

# **UL-LRF-12 Eyesafe Laser Rangefinder**

## **SPECIFICATIONS**
